Mindset Frameworks

| Operate with energy-first, micro-moves, and real-world feedback.

Use This Page in Order

1. Set your priorities in **Daily Operating System**.
 2. Define the next **5-minute move**.
 3. Use **Decision Filters** when stuck.
- Keep it fun. Keep it minimal. Track reps.

Start Here

- ☐ Define today's 1-3 priorities
- ☐ Schedule the next 5-minute micro-move for prority #1
- ☐ Trust God and take action

▼ Core Questions for Success

"What are they seeing what I'm not?" "What CAN we do?"

That NEW NEW:

- ***What might tickle me so much today that I feel nostalgia when looking back?***
- *What might love require from me today?*
- What can I do that will promote deep work?

Asking myself (from old 📖 [Personal Guidelines](#))

What feels unbearable? How can I make it 5% better?

Am I investing in my social skills?

Am I working on what actually matters?

What would this look like if it were easy?

I feel good - how much better can I feel?

What is the metric? What is the needle mover?

What is the target ROI?

What is my intention? What do I want to get out of this?

What are my problems? How can I find solutions?

What 3 levers can I move to create my future vision?

When making a decision, ask - "What would (best person in my industry) do?"

Am I developing my posture habit? Yes

Am I developing my comedy habit? Not yet

Am I developing my podcast habit? Sort of - working on communication so that I'm fucking dope at podcasting

What does success look like?

What's practical?

What do I have? What do I want? What am I doing?

What would I do if I had 10x more agency? What if I had 10x less time?

What small win can I rack up today to keep momentum?

"What do I think about x" - Say out Loud: this warms up subconscious (most people cold start)

1] What does success look like?

👉 Securing job that fits my profile

2] What is practical?

👉 Working where one of my friends does

3] What would I do if I had 10x the Agency? If I could achieve anything, what would I be working on ??

👉

Frameworks (Quick Reference)

1. Future Benefit Extraction → Charge actions with future rewards.

2. Energy-Led Action → You supply the energy.
 3. Visual Feedback Loop → See truth, not story.
 4. Consistency > Intensity → Count reps and ticks.
 5. Micro-Move Protocol → Always define the next 5 minutes.
 6. ROI Mindset → Highest return on time, effort, attention.
 7. Minimalist OS → Build around a few pillars. Be world-class at one.
 8. Fun-Max → Engineer enjoyment. Energy enhancing.
 9. Pressure Testing → Launch, test, iterate in reality.
-

▼ Mindset Cues & Reps

🎓 Be kind, bring joy,, repeat

| 🧠 5 minute steps. What is my next 5 min step? 🧠 5 minute steps.

» What is my next 5 min step?

how many cards tonight will I play?

how much focus will i give to playing these cards

and when might be beneficial to pick em up again?

how much juice am I squeezing out of this? A.K.A. how far am I setting my sail to take it? Is it worth the effort? A.K.A. is the juice worth whatever I'm squeezing rn ???

🎯 » What cards am I playing? What skill am I training? What XP am I gaining?

~~how many cards am I playing? at what frequency? ☀️

when will I stop pause/analyze/adjust the games I'm playing? → why?

to play better [meaning Higher leverage] cards in higher leverage // better games~~

| [~~1 that is it... but that's jus in yo head, not on the streetz~~]

🎓 ★ "I'll do it or die." ★ → Powerful. The world has a strange way of stepping aside from those with this approach.

🎓 Notes don't matter. Fruits do.

🎓 "You must be willing to let go of the last action and pour yourself fully into the next action."

🔑 Outlast the suck and keep doing reps

Go right up to where it hurts and hang out there 🤖 (once comfy, go a lil more. Then again)

Baby step(s) > off balance and compensated lunge aimed at the very end.

If it's not landing, slow it down till you know it does. Then crank the flow back up. EZ!

Dial in 👁️ | **Get chest big then lock it in so these hoes have no choicessss 🔥 🧠**

Nothing to lose that's how I see myself and how would someone with nothing to lose act in this moment this very moment right now??

whatever the situation

whatever the move I need to make to make

I'm stepping up to take what I need to take.

Life is a massive multiplayer game where you're skilling by yourself to flex on the others... sounds familiar... Self skilling. Micro dials in practice from right place. Voice cards post HTX 🍎

Practical Operating System

▼ Daily Operating System

1) Focus Setup

- What are my 3 priorities, when will I do them, and for how long?
- What is the single highest-impact action right now?
 - Land work
- What is my next checkpoint?
 - HEB

2) Micro-Move Protocol

- Never leave the site of action without the next 5-minute step defined.
- Decide the latest time you'll take that step today.

3) Energy-Led Action

- Bring the energy to the task. Don't expect the task to supply it.
- Use visual feedback to cut narrative. Measure reps, not vibes.

4) Daily Gold

- What gold can I extract from today?
 - How can I make today a masterpiece?
 - What will help me see more improvement tomorrow?
-

Decision Filters

- Is this worth the time and mental hassle?
 - Where is the leverage?
 - Am I optimizing for long-term compounding or short-term gain?
 - Am I acting from emotion or clear judgment?
 - What incentives are driving this behavior?
-

Identity → Behavior

- Arrived. Serve. Give.
- Creative. Consistent. Minimalist. Focused.
- You reset and go again. Momentum is a choice.

Habits

- Before acting: What's my intent?
 - Before finishing: set the next 5-minute move.
 - Raise the floor: define non-negotiable daily reps.
 - Launch more. Perfect less. Track what works. Iterate fast.
 - Make tasks easier, lighter, more fun.
-

Anti-Drag Toolkit

- Reduce friction: remove or automate one drag today.
 - Easiest way to get this done?
 - What am I overcomplicating?
 - Turn boredom into iteration time.
 - Gamify: rivals, small challenges, PRs.
-

Health First

- 20/20/20: every 20 minutes, look 20 feet away for 20 seconds, then move.
 - Sleep window, sunlight, hydration. Guard the basics.
-

Smoking Intercept (if urge hits ~5 hours in)

- Why do I want this? What's my intent with this hit?
 - What can I control right now? Choose a 5-minute move.
 - Visualize the rep streak you're protecting.
-

Review Loop

- Reps done today. What worked? What will I change tomorrow?
 - What feedback can I use?
 - What am I paying attention to and why?
-

▼ Archive (unique scraps only)

"Think like Hance through to next checkpoint"

| What is my next checkpoint?

→ Have I thought through it like Hance? How can I make it more fun?

🎓 The magic you're looking for is in the work you're avoiding.

→ Consistently create content over a long period of time ←  Creative

 Notion Templates old → "What must be said to make substantial \$ from this product?"

Beast Mindset: 5 focused hours a day can figure out anything.

Intent vs. itinerary: clarify purpose, then choose flexibility.

De-charge & Re-charge ⚡ The world reacts to how I feel. Don't make it a single-player game.

DBU check: down, back, up.

Edit mode on/off? Choose consciously.

Blasting emails → "How can this help me?"

▼ practical content sorting

For each video:

- Is there something worth posting?
- If no, is it worth saving for future positive review?
- If no, delete. If yes, where will it live and when will I use it?
- How will I find it later?
